

Kusel 10 Row A-Frame Press shown

A-FRAME PRESS

Kusel's A-Frame Press provides a practical way to accomplish the important curd pressing operation... saving you valuable floor space, precious time, excessive labor and most importantly, MONEY.

KEY FEATURES

- Simple design for most popular size hoops. Large sturdy casters permit easy rolling to vat or filling equipment to load...then to air supply station for pressing. When ready, the entire unit can be wheeled to a hoop removal/packaging area.
- Bottom collector pan accumulates whey and drains to one end for easy collection.
- Air cylinders provide constant even pressure to each stack. Pressure reducing / regulating valves allow for variable adjustments to the pressure settings.
- "Slant-in" style stacks provide best drainage from each hoop. Stacks are secure and need no additional lock-in devices or bracing.
- Available in standard 2 row through 10 row presses. Single row lab sizes & other custom options readily available.
- For 40 pound blocks with 7 per row. Available for other types of moulds on a custom basis.
- Standard press size is 42 inches wide with a maximum 96 inch height. The length will vary based on the number of rows. These dimensions can be customized based on customer need.

CONSTRUCTION

- All stainless-steel construction with 1-1/2 inch sanitary fitting whey outlet
- Anodized aluminum cylinder head cap and body
- Stainless-steel cylinder shaft
- Painted mild steel cylinder mounting plate (stainless-steel optional)
- 4 swivel type casters with wheels
- Directional air valve for each cylinder (Red ball handles optional)
- Air line filter with pressure reducing / regulating valve with standard 2-125 PSIG

STANDARD OPTIONS

- All stainless-steel cylinder mounting plate
- Round Hoop Adapter Kit for 5-1/4 inch to 15-1/2 inch moulds
- Red ball handle air valves
- 2 and 4 row presses can have varying heights and working levels to accommodate different number and types of moulds
